grandMA Remote Software via iTunes store

How to load the grandMA Remote Software from the iTunes store?

Please follow the link on the MA Lighting webpage. Your iTunes program should start automatically and recall the grandMA Remote software for download.

You need to be registered with your iPod touch or iPhone at Apple with your name, some details and your credit card in the iTunes store. Now you can start to download and install the software. Your credit card will not be charged - The grandMA Remote software is for free!

If you are already registered you can directly start downloading and install the software.

grandMA Remote on iPhone or iPod touch works exactly the same way as the PDA-Version does. Means it does not matter if you use grandMA Remote with iPhone, iPod touch or PDA.

The PDA software version is still available via our MA Lighting webpage. The Apple software is only available via the iTunes store.
